

- Tentative Programme –
**Start-up Seminar on “The Promotion of Technology and Innovation Cooperation
Between Thailand and Israel”**
6 August 2024
Anantara Siam Bangkok Hotel, Thailand

Tuesday, 6 August 2024

Dress code: *Business attire*

Seminar on “The Promotion of Technology and Innovation Cooperation Between Thailand and Israel”

Venue: Pimarnman Room, Anantara Siam Bangkok Hotel

- 09.30 hrs. - Registration
- 10.00 hrs. - H.E. Mr. Dusit Manapan, Advisor to the Minister of Foreign Affairs delivers the opening remarks (3-5 mins)
- Presentation by Israeli Startup Companies on AgriTech and FoodTech (7 mins each)
- Agrinoz
 - GLA-ECO
 - Seymour
 - Vgarden
- Q&A
- 11.00 hrs. - Coffee break
- 11.15 hrs. - Seminar on “**The Promotion of Technology and Innovation Cooperation Between Thailand and Israel**” (Cont.)
- Presentation by Israeli Startup Companies on ClimateTech, EnergyTech, Security and Venture Capital (7 mins each)
- Fruit-OH
 - Wastepoint
 - Afcon Software Solutions
 - Gmafcon Security Technologies
 - Magos
 - ZOOZ Power
 - AWZ
- } (20 mins)
- Q&A
- Business Matching
- 12.30 - 13.30 hrs. - Lunch
- 13.30 - 14.15 hrs. - Lecture on “**Exploring Trade, Investment, and Startup Collaboration Opportunities in Thailand**”
- Representative of the Office of the Board of Investment (BOI)
 - Representative of the National Innovation Agency (NIA)
 - Representative of the Thai-Israel Chamber of Commerce
- 14.15 hrs. - Coffee break
- 14.30 - 15.00 hrs. - Business Matching

**Israeli Startups attending the seminar on
 “The Promotion of Technology and Innovation Cooperation between Thailand and Israel”
 5 – 8 August 2024**

No.	Startup	Brief Description	Website
1	Seymour	Seymour Ag specializes in agricultural technology and cultivation. Seymour’s technology enables customers to create an intuitive Agri-IoT Ecosystem and provide an affordable solution that allows real-time reliable data analysis of water, soil, plant, and atmosphere. The monitoring stations measure the entire cultivation system and offer a comprehensive data collection solution.	https://www.seynouragri.com
2	Agrinoze	Agrinoze’s proven plant resource management solution is the first fully autonomous & automatic system for the market. The groundbreaking algorithm, machine learning and holistic approach has been tested and validated by numerous projects globally; consistently delivering reliable and scalable results while continuously leveraging data for even better, more precise, and efficient irrigation and fertigation. The system enables the automatic defining and profiling of the soil in each project to provide for the specific requirements, constraints and needs – developing, planning, implementing, deploying, and monitoring 24/7.	https://www.agrinoze.com
3	Zeus AI	ZEUS AI usher clients into a new technological era, armed with a proven track record of success across diverse operational fields. The dynamic team comprises 30 adept engineers and software developers, forming a powerhouse unit of professionals dedicated to achieving goals efficiently. ZEUS AI pride themselves on being quick to respond, determined, and focused on helping our clients intelligently leverage the latest technological tools. With a commitment to mastery and a smile, ZEUS AI empowers businesses to elevate	https://www.zeusint.com

		their performance and achieve superior results in today's competitive landscape.	
4	GLA-ECO	GLA-ECO operates in the fields of agriculture, cannabis, cosmetics and pharmaceuticals in which there are many health hazards in the common commercial preparations, even in those that claim to be natural products. In the background of the company over 20 years of experience in research and development of the chief scientist, who dedicated his life to creating effective and safe solutions.	https://www.gla-eco.com/
5	Vgarden	Vgarden specializes in developing, manufacturing and marketing vegan products in Israel and around the world. The company has two factories, the first in Kibbutz Gan Shmuel, which manufactures, among other things, for the Israeli market under the Mashu Mashu brand, and another plant in Brisbane, Australia, which manufactures and markets to the Australian market. Vgarden specializes in the development and production of the following products: 1. Vegan cheese (Mozzarella and other hard cheeses, spreads, butter, etc.) 2. Vegan sausages (pepperoni, salami and ham) 3. Fish substitutes (tuna and salmon) 4. Frozen meat substitutes (hot dogs, hamburgers, minced, etc.)	https://www.vgardenfoods.com/
6	Wastepoint	WastePoint dedicates itself to transforming waste management through cutting-edge waste-to-energy technologies. Serving both South East Asia and Europe, WastePoint commits to eco-friendly solutions that empower communities, enhance sustainability, and promote renewable energy utilization.	https://www.wastepoint.energy
7	Momentick	Delivering emissions intelligence for industries and financial markets on a global scale. Momentick harnesses the power of high-resolution satellite imagery to deliver precise, accurate and autonomous GHG	https://www.momentick.com/

		emissions detection and monitoring on a global scale. The advanced solutions provide the essential emissions intelligence industries, financial institutions and governments need to detect, measure and halt emissions — anytime, anywhere.	
8	Boson Energy	<p>Boson Energy was founded with the vision to produce local hydrogen directly from biomass and waste.</p> <p>Boson Energy is part of a new generation of technologies that are not force-fitted into the energy transition and decarbonisation, but rather built for that very purpose. The team comprises of management, board, and advisors that have experience from many of the world's foremost companies within waste management, advanced thermal treatment, energy, cleantech, air pollution control, supply chain management, execution, plant operation, etc.</p>	https://www.bosonenergy.com
9	ZOOZ Power	ZOOZ Power focuses on enabling ultra-fast EV charging through their Kinetic Power Boosters, which overcome grid limitations and provide sustainable energy solutions. The flagship product, the ZOOZTER™-100, uses proprietary flywheel technology to deliver high-power charging with a long lifespan, making it a cost-effective and environmentally friendly option for EV charging networks. This innovative technology supports the rapid growth of electric vehicles by offering efficient and scalable charging solutions.	https://www.zoozpower.com
10	GMafcon Security Technologies	GMafcon specializes in advanced perimeter security solutions. The design, develop, manufacture, and implement systems such as digital electric fencing and electronic sensors for various applications, including airports, seaports, factories, and military sites. The flagship product, the V-ALERT digital sensor, provides real-time alerts for intrusions, ensuring high security and reliability. This technology is renowned for its sensitivity, intelligence, and reliability, having received approval from the Technological Unit of the IDF for monitoring Israel's borders.	https://www.gmsecurity.com/

11	Afccon Software Solutions (AFCON SWS)	AFCON SWS offers comprehensive SCADA (Supervisory Control and Data Acquisition) and Integrated Facility Management Systems (IFMS). The solutions transform raw data into actionable insights, aiding managers in making informed business decisions. Key products include Pulse™ SCADA for industrial automation, Pulse™ BMS for building management, Pulse™ MES for manufacturing execution, and Pulse™ EV for electric vehicle charging management. The technology enhances efficiency, productivity, and sustainability across various sectors, providing a centralized view of operations and enabling real-time control and optimization.	https://afconsws.com/
12	Magos	Magos is a startup in the Homeland Security (HLS) sector that specializes in developing short-range radar devices. The technology focuses on advanced perimeter security solutions, utilizing innovative radar systems for intrusion detection and protection. Magos' radar devices offer high-resolution detection capabilities in various environments, providing a cost-effective alternative to traditional perimeter security methods. These compact radar systems are suitable for critical infrastructure protection, border security, and other high-security areas requiring reliable threat detection.	https://magosystems.com/
13	AWZ	Awz combines business, technology & investment experts with the world's leading security & intelligence minds to deliver exceptional returns to the investors by actively guiding the portfolio companies through their journey to commercial success and liquidity opportunities.	https://www.awzventures.com/
